

BIOL 567

Introduction to biological data analysis

Fall 2017

Instructor: Scott Sherrill-Mix

Location: 123 Someplace

Time: Wed 1-3pm

Website: <http://somewhere.edu/BIOL657/>

Office: 345 Somewhere

Office hours: By appointment or Wed 3-5pm

Email: shescott@upenn.edu

Phone: (234) 567-7890

Course description

Some more text and a lot more. The Department of Computational Medicine and Bioinformatics (DCMB) invites applications from outstanding candidates for a junior level research track faculty position. This is an exciting opportunity to jumpstart your career with high impact research projects and the potential to advance to an independent principal investigator at the University of Michigan. The position will involve integrative analyses of data from various high-throughput molecular approaches (epigenomics, regulomics, transcriptomics, and genomics) with a focus on projects related to cancer and environmental health, and will be supervised by Dr. Maureen Sartor.

Objectives

- Batch process large datasets
- Common databases
- Source control
- Reproducible research
